Art Unit: 2875

1. The Request for Continued Examination (RCE) and the Information Disclosure Statement (IDS) each filed on September 8, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-20 are allowed.

The prior art of record, including Mullani (U.S. Patent Application Pub. No. US 2004/0174525 A1), Twardawski (U.S. Patent Application Pub. No. US 2004/0141316 A1) and Brodak (U.S. Patent No. 6,000,811), fails to show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a portable lighting device combining:

a switch closing the first circuit by pressing its first surface, or closing the second circuit by pressing its second surface, or closing both the first and second circuits by pressing its third surface as recited in claims 1, 8 and 16.

The above-indicated combination, including a switch including a first, a second and a third surface portions, and wherein pressing of each of the surface portions selectively to close the first or second, or both the first and second circuits, makes this disclosure unique.

Mullani (U.S. Patent Application Pub. No. US 2004/0174525 A1) discloses a portable lighting device including a first and second light sources electrically coupled to the respective first and second electrical circuits. Further, Mullani (U.S. Patent

Art Unit: 2875

Application Pub. No. US 2004/0174525 A1) teaches two switches individually dedicated to each of the first and second circuits. However, Mullani does not includes a switch including a first, a second and a third surface portions each dedicated to the first, a second, and both circuits as detailed above.

Similarly, neither Twardawski (U.S. Patent Application Pub. No. US 2004/0141316 A1) nor Brodak (U.S. Patent No. 6,000,811) teaches a combined switch having a first, a second and a third surface portions wherein pressing the each of the three surface portions respectively closing the first circuit, the second circuit and both circuits as detailed above.

Thus, neither combined nor individual teaching of Mullani (U.S. Patent Application Pub. No. US 2004/0174525 A1), Twardawski (U.S. Patent Application Pub. No. US 2004/0141316 A1) and Brodak (U.S. Patent No. 6,000,811) meets the limitations of claims 1, 8 and 16.

Therefore claims 1, 8 and 16 are allowed over prior art.

Claims 2-7 and 18-20 are necessarily allowed because of their dependency on the allowed Claim 1.

Claims 9-15 are necessarily allowed because of their dependency on the allowed Claim 8.

Claim 17 is necessarily allowed because of their dependency on the allowed Claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2875

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Watterson et al. (U.S. Patent No. 6,623,140 B2), Schaller et al. (U.S. Patent No. 5,077,644), Green et al. (U.S. Patent No. 4,3598614), Ito et al (US Patent No.; 6,809,273 B2) and Karasik et al. 9US Patent No.: 5,824,978)

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hargobind S. Sawhney whose telephone number is 571 272 2380. The examiner can normally be reached on 6:15 - 2:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on 571 272 2378. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
